Contentworks sponsors  
Decentralized Blockchain  
Conference

We love networking here at Contentworks and the upcoming **Decentralized 2018** conference – which will take place from 14-16 November at the Divani Caravel Hotel in Athens – will enable us to meet some of the brightest minds in the finance and technology sector. The emergence of disruptive blockchain and crypto-related technology is sure to fuel many interesting conversations and we're thoroughly excited to be part of this eagerly anticipated summit. Plus... drumroll... Contentworks will be media sponsors for this exciting event. Bring it on!

## Hosted by the University of Nicosia

Niki Nikolaou, Business Director at leading Limassol based agency Contentworks, looks at how Blockchain technology is shaping the island of Cyprus.

Blockchain technology was introduced in 2008, by Satoshi Nakamoto, an anonymous developer who created the technology as the accounting basis for Bitcoin. Of course, the technology has come a long way over the past decade, proving itself to be an effective way for individual, businesses and even governments to carry out transactions. Created as a digital, decentralised and immutable public ledger of transactions, the greatest advantage that blockchain offers is the ability to customise it to record transactions and the transparency it affords.

*Niki Nikolaou*

The Athens summit is set to attract over 1500 attendees from more than 50 countries as well as a great variety of sponsors and exhibitors. It will take place from 30 October – 1 November at the world-class Divani Caravel hotel in Athens. Last year attendance from Cyprus was high, with businesses from the finance sector keen to follow the latest blockchain developments.

Contentworks Agency, a key media partner for the event looks at what's in store for Decentralized 2019.

#### **What to Expect**

Decentralized 2019 will unite leading global executive and academics to debate current trends and developments within the blockchain sector. There will be three main areas of focus, these are:

#1 Business: Discover how blockchain and cryptocurrencies will disrupt business.

#2 Technology: Learn about the latest technological developments and their global impact.

#3 Academia: Find out what's in store for a blockchain-led future.
